

## Brand Medications Requiring Use of a Generic First

You can save money by using safe, effective generic medications when possible. According to your prescription benefit plan, you will have to try a generic medication first before certain brand-name medications will be covered. The chart below tells you which kinds of drugs require you to use a generic first. This chart only provides a sample list of generic drug options and may not include all drugs available.

<b>Drug Class</b> <i>Condition Treated*</i>	<b>Step 1:</b> You will have to try one of these generic medications first:	<b>Step 2:</b> Before you can try one of these non-preferred brand drugs:	These preferred select brand drugs do not require use of a generic first:
<b>Proton Pump Inhibitors (PPIs)</b> <i>Stomach Acid</i>	esomeprazole lansoprazole delayed-rel omeprazole delayed-rel pantoprazole delayed-rel	Prilosec Packets	Dexilant

\*This list indicates the common uses for which the drug is prescribed. Some medicines are prescribed for more than one condition. Brand-name drugs not listed here may be covered by your plan without the use of a generic first. Information provided here is not a substitute for medical advice or treatment.
